# Introduction

Annually the Department of Elementary and Secondary Education collects from school districts a variety of data which are used for program approval, allocation of state and federal funds, and classification purposes. Many of these data are summarized in various state-level reports such as those found in the annual "Report of the Public Schools." In order to increase the usefulness of these statistics for school boards and administrators, the Department has developed the "School Profile Reports." These reports are provided annually to all school districts in the state as a simple and convenient way for decision makers to use available statistics for evaluation and planning.

This booklet contains a set of twenty State Profiles. **District Profiles are also provided which include information about your school district only.** The State Profiles portray the same data as the District profiles in five categories. Administrators may compare local district statistics with state statistics in the following categories:

1. *State* averages
2. *High School or Elementary District* averages
3. Four *Classification* categories — Accredited, Provisionally Accredited, Unaccredited or Not Reviewed
4. Five *Size* categories measured in terms of fall enrollment
5. Four *Wealth* categories measured by ranges of equalized assessed valuation per EP
